

MESH COAT

- DESCRIPTION:** California Stucco Mesh Coat is an acrylic Portland-base product packaged in 80-lb bags.
- APPLICATIONS:** California Stucco Mesh Coat can be used as an adhesive to affix EPS foam board to cement bases, Gypsum Board, plus detail work such as bands, quoins, etc., and can also be used to embed fiber glass mesh to EPS foam board. Apply with a notched trowel.
- COVERAGE:** Coverage is approximate and variable depending on method used. When used to embed fiberglass mesh, approximate coverage is 140 square feet per bag. When used to adhere EPS to substrate, approximate coverage is 90 square feet per bag.
- SOLUBILITY:** California Stucco Mesh Coat should be cleaned from tools and equipment with water immediately after use.
- STORAGE:** Bags must be stored off the ground or floor and kept in a cool, dry area protected from rain and other damage.
- LIMITATIONS:** California Stucco Mesh Coat should be applied only to frost-free and unfrozen surfaces above 40 degrees Fahrenheit. If ambient temperatures fall below 40 degrees Fahrenheit, weather protection must be provided.
- MIXING:** Add only water and mix thoroughly to a working consistency. Allow to slack about 10 minutes, remix and apply.
